

Kingdoms

organisms are classified into 6 kingdoms:

1. Eubacteria
 2. Archaeobacteria
- > were formerly known as Monerans
(bacteria)

These groups do not contain a nucleus

prokaryotic

3. Protista

These are eukaryotic organisms that are not fungi, plants or animals

4. Fungi

These are heterotrophic organisms who feed on dead or decaying matter

5. Plantae

These are autotrophic, multicellular organisms

6. Animalia

These are multicellular, heterotrophic organisms that have the ability to move (most)
